The best possible TR-3B video ever shot

Many believe this to be the Aurora Project, but i don't know
Their has been a lot of interest in this Military aircraft,known as the TR3B.The TR3B is a triangular shaped Nuclear powered aerospace craft.Many,like myself wounder what the propulsion is,that makes it possible.Here how Mr.Fouche a physics expert.A circular,plasma filled accelerator ring,called the Magnetic Field Disruptor surrounds the rotatable crew compartment,and is far ahead of any imaginable technology.The plasma,mercury based,is pressurized at 250,000 atmospheres,at a temperature of 150 degrees kelvin,and accelerated to 50,000 RPM to create a super conducted plasma,resulting in gravity disruption.The MFD generates a magnetic vortex field,which neutralizes the effects of gravity by up to 89%.
